EXPERIENCE

Banao Technologies (Across The Globe)

Jan 2026 – Present

Full Stack Intern

- Engineered **end-to-end full-stack features** for an AI-driven recruitment platform using **React.js/Next.js** and **Node.js/Express**, independently owning modules such as AI Interview, Assessments, Candidate Management, and Reporting Dashboards from design through production deployment.
- Architected **RESTful APIs**, **MongoDB/Mongoose data models**, and **JWT-based authentication with role-based access control**, enabling secure project-scoped workflows across production and pre-production environments.
- Integrated **LLM (Gemini) workflows** into core product features including AI-generated technical documentation, test cases, and candidate reports reducing manual content-generation effort and accelerating feature delivery.
- Built and scaled a **Playwright-based browser automation framework** with rule-based verification, automating daily test runs, failure analysis, and detailed reporting to significantly reduce manual QA effort.
- Managed containerized **deployments** (Docker, Docker Compose) on VPS infrastructure and resolved production incidents, ensuring reliable releases and minimal downtime across environments.

PROJECTS

QA Tracker | Project Management App | Live Demo

- Built a full-stack project and QA task management platform with **JWT/bcrypt authentication**, protected routes, **role-based access**, and a **RESTful API** supporting **pagination**, **search**, **filtering**, **sorting**, and normalized **MongoDB schemas** with relational references.
- Developed an **analytics dashboard** with **MongoDB aggregation**-driven stats and task/priority distribution tracking, along with a reusable **component architecture** (modals, tables, badges, skeleton loaders) and a **responsive**, toast-enabled UI with persisted layout state.
- Tech Stack:** React 19, Vite, Tailwind CSS 4, Node.js, Express 5, MongoDB, Mongoose, JWT, bcrypt | Deployed on Netlify (frontend) & Render (backend)

NewsFlash | Curated News Aggregation Platform | Live Demo

- Built a responsive **React** SPA aggregating real-time news across 100+ global topics by integrating multiple **third-party APIs** (NYT, NewsAPI, WorldNewsAPI, YouTube API), with dedicated Trending, Local, Global, and Video sections for improved content discovery.
- Implemented interactive **3D visual elements** using **Three.js (React Three Fiber, Drei)** and scroll-driven animations with **GSAP** and **react-scroll-parallax**, while optimizing asset loading and 3D model rendering for faster page performance.
- Tech Stack:** React 18, React Router, Three.js, React Three Fiber, GSAP, Tailwind CSS, Vite

EDUCATION

Lovely Professional University

Jul 2019 – Jul 2023

Bachelor of Technology in Computer Science and Engineering (hons.)

Jalandhar, Punjab

SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js

Database: MongoDB, Mongoose

Testing & Automation: Playwright, End-to-End Testing, AI-driven Test Automation

Authentication: JWT, bcrypt

Cloud & Storage: AWS S3, Presigned URLs

DevOps: Docker, Docker Compose, Nginx, Linux, VPS Deployment

AI Integration: LLM APIs (Gemini), AI-assisted Workflow Generation

Version Control: Git, GitHub
